

# RR301 Professional Air Conditioning Machine

Introducing our brilliant Air conditioning machine range. Fully equipped with the latest technology and offered in either old gas R134A or new gas R1234YF configuration. We offer a supply and install service and even F-Gas training if required. High quality touch screen interface all designed and manufactured in Italy.

## OLD GAS (R134A)

## NEW GAS (R1234YF)

### The Best Of Both Worlds!

Having 2 separate V-Tech Air Conditioning machines means you can service 2 different gas vehicles at the same time at various locations within the workshop.
