

### Technical specifications

- Capacity 4000 kg.
- Rise time 45 sec.
- Drop time 45 sec.
- Lifting height 1930mm
- Min Height 100mm
- Overall Height 2824mm
- Overall Width 3366mm
- Distance between columns 2506mm
- Short Arm Length 680-1020mm
- Long Arm Length 860-1300mm
- Power Options -  
220v / 50Hz / 1Ph / 3KW  
380V / 50HZ / 3PH / 3KW

- Dual hydraulic cylinders, direct drive
- Dual point automatic lock release (electromagnetic)
- Two-stage telescopic lifting arms
- Spiral stepless adjustment arm tray, optional extension adapter
- Mechanical safety device, both sides manual unlocking, manual dropdown
- Italian made parachute valve under each cylinder in case of hydraulic hose failure

- Relief valve to prevent overloading
- Door opening protection rubber
- Lift height limit safety system
- Synchronization cable
- Aluminum shell motor, 24V low voltage control system
- Emergency manual drop function with adjustable dropping speed
- Machine Welded for extra stability
