V-TECH GARAGE EQUIPMENT

COMBI (EMISSIONS ANALYSER)

20 YEARS

DVSA COMPLIANT GAS & SMOKE ANALYSER

The V-Tech Combi is a fully integrated PC based Gas & Smoke Emissions Analyser. Manufactured in Sweden and supplied to thousands of workshops for over 20 years, this long-lasting Emissions Analyser offers exceptional quality, reliability & value for money.

Fully MTS Connected and Euro 6 compliant, the V-Tech Combi has provided workshops with a cost-effective solution to Emissions testing for a number of years, with all previous DVSA database updates and regulation changes being compatible via a simple software update.

› 5 year warranty
› Quiet operation
› Rapid CAL/ZERO HC
› Hang-up & refresh times
› Faster data refresh
› Long service life
› No extortionate repair invoices
› SMART card ready

SMOKEHEAD

PC WITH WINDOWS 11

Service:

› Calibrated & Supported by V-Tech Engineers
› Remote Support

› Fleet of Loan Units

LASER PRINTER

Warranty & Support:
The V-Tech Combi is offered with a standard 5 year warranty on the Gas & Smoke analysers which comprises of the 1st year being a full (parts & labour) warranty & the remaining 4 years being a parts warranty. We at V-Tech UK understand that the most important part of being an MOT station is keeping the MOT bay running. For this reason alone we offer a 2-tier warranty service, which allows us to support you better. Traditionally most companies will only offer a call out service in the event of equipment failure, which means an engineer will attend the site. However it's difficult to predict when an engineer will be available and this often leaves you the customer, stranded! We therefore offer a loan unit system also.
